LinkedIn — Beyond My Resume

Summary

Product Manager who diagnoses the bottleneck before choosing the fix. 4+ years building AI-powered features across B2B SaaS, enterprise software, and IoT products. Chose pricing experiments over added acquisition spend, PRDs over rushed builds, and workflow redesign over new headcount, decisions that drove acquisition up 30%, activation up 25%, feature engagement up 35%, and paid conversion to 4.3%.

Skills

Product Management: Product Strategy, Product Discovery, Roadmapping, Product Requirements Documentation (PRD), MVP Definition, Feature Prioritization (Value vs. Complexity), Pricing Strategy, Go-to-Market Strategy, Product-Led Growth (PLG), Success Metrics Definition

AI Product Management: Generative AI, LLM Applications, AI Workflow Automation, Prompt Engineering, Recommendation Systems, AI Feature Development, AI-Assisted Document Review

Execution: Agile, Scrum, Sprint Planning, Backlog Prioritization, User Story Writing, Release Management, Cross-Functional Stakeholder Management, SLA & Turnaround Monitoring

Analytics: SQL, Conversion Rate Optimization, Retention Analysis, A/B Testing, Funnel Analysis, Engagement Analysis, KPI Tracking

UX & Research: User Interviews, Surveys, Persona Development, Journey Mapping, Usability Testing, Wireframing, Figma

Tools: Jira, Confluence, Notion, Slack, Wrike

Experience

Product Manager

Sep 2025 – Present

Sportstech

Bangalore

Consumer IoT subscription platform — 174K+ freemium users, 12.4K+ paid subscribers.

- Saw flat acquisition despite steady traffic, prioritized AI-enabled coaching over generic promotions, growing new user acquisition by 30%.
- Identified device pairing as the top onboarding blocker, redesigned the flow instead of adding tutorial content, lifting Day-1 activation by 25%.
- Developed the recommendation strategy for an AI coaching engine using workout data, increasing session completion by 22% and daily active users by 22.4%.
- Saw strong activation but weak paid conversion, prioritized pricing experiments over further acquisition spend, lifting conversion to 4.3%, retention to 96.8%, and subscriber growth to 81.9% YoY.
- Owned the roadmap for connected-device features, coordinating engineering and design across mobile platforms.

Product Manager

Apr 2024 – Sep 2025

GetAI (ITC Infotech)

Bangalore

Enterprise operations platform for manufacturing and contract management.

- Identified manual contract review as the compliance bottleneck, shipped three AI-driven capabilities including an LLM-based clause review assistant, growing feature engagement by 35% and active usage by 20%.
- Traced release delays to missing acceptance criteria, wrote detailed PRDs and release plans before development began rather than after, achieving 95% on-time release completion.
- Found stakeholders compiling adoption data manually, launched analytics dashboards over ad hoc reports, cutting reporting turnaround time by 40%.

Product Manager

2022 – Mar 2024

VS Happy Infotech

Bangalore

US financial services platform. Joined Feb 2020 as Team Manager; promoted to Product Manager in 2022.

- Diagnosed loan onboarding friction through customer feedback and usage data, redesigned the funnel over patching steps, lifting NPS by 20 points and cutting churn by 20%.
- Traced slow time-to-value to redundant manual steps, chose workflow redesign over adding support staff, cutting time-to-value from 14 to 6 days.
- Saw inconsistent delivery across 10+ initiatives, standardized PRDs over informal specs, improving delivery alignment across teams.
- Noticed SLA misses were caught only after the fact, created SQL dashboards over relying on weekly manual reviews, trimming reporting effort by 30%.

Product Experience

Glide — Travel Super App (0 → 1 Product Build)

Independent build — sole product owner from concept through prototype validation.

- Mapped the travel booking journey through user interviews, surfacing pain points across visa, flight, hotel, and transport steps.
- Defined the MVP roadmap and go-to-market plan, prioritizing checkout unification over building every booking vertical first.
- Wrote the PRD translating research into MVP scope, sequencing features using value-vs-complexity trade-offs.
- Designed a unified cart and checkout over separate flows per vertical, cutting booking steps by 40%.

Early Career Experience

Quality Control Inspector, Apave International (Apr–Dec 2019) — **Ops Planning & Control Apprentice**, BHEL (Mar 2018–Mar 2019) — **Site Engineer**, Essar Steels (Jun 2017–Feb 2018)

Education & Certifications

BBA — Bharathidasan University — Mechanical Engineering — GPTC, Trichy

Certifications: Product Management (Great Learning) • Digital Product Management (University of Virginia) • Google Project Management (Coursera)
